

ENVIRONMENTAL POLICY

- Surya Chem specializes in the manufacturing and supplying of Liquor Ammonia (Normal and DM Grade) and Anhydrous Ammonia, available in both cylinders and tankers. Our commitment to environmental sustainability underpins all aspects of our operations.
- We are dedicated to maintaining a safe and healthy workplace, ensuring that all personnel are thoroughly trained and equipped with the necessary safety and emergency equipment
- We are committed to being an environmentally responsible partner in the communities where we operate. We act swiftly and responsibly to address any incidents or conditions that may pose a risk to health, safety, or the environment, promptly notifying authorities and informing affected parties as necessary.
- We are committed to developing, manufacturing, and marketing products that prioritize safety in their intended use, optimize energy efficiency, protect the environment, and support safe reuse, recycling, or disposal practices.
- We employ development and manufacturing processes that minimize environmental impact, continuously enhancing operations and technologies to reduce waste, prevent air, water, and other pollution, and mitigate health and safety risks. We are dedicated to the safe and responsible disposal of all waste materials.
- We actively contribute to global efforts for enhanced environmental protection and awareness, sharing relevant pollution prevention technologies, knowledge, and best practices.
- All employees are expected to adhere to this policy and promptly report any environmental, health, or safety concerns. Managers are responsible for addressing such matters without delay.

Mr. Pravin M. Jani
Managing Partner
